POPULATION HEALTH DIVISION
SAN FRANCISCO DEPARTMENT OF PUBLIC HEALTH

Outline

- New diagnosis trends
- Focus populations: People Experiencing Homelessness, Latina/o/x persons
- PLWH: gender, age, racial/ethnic group
- HIV care continuum
- National HIV/AIDS Indicators measured by Medical Monitoring Project
- Trends in HIV Pre-exposure prophylaxis (PrEP)

New HIV diagnoses, deaths, and prevalence, 2006-2023, San Francisco

PWH diagnosed in SF alive Dec. 2023

-New diagnoses: gradual trend downward

-Deaths increased in 2022

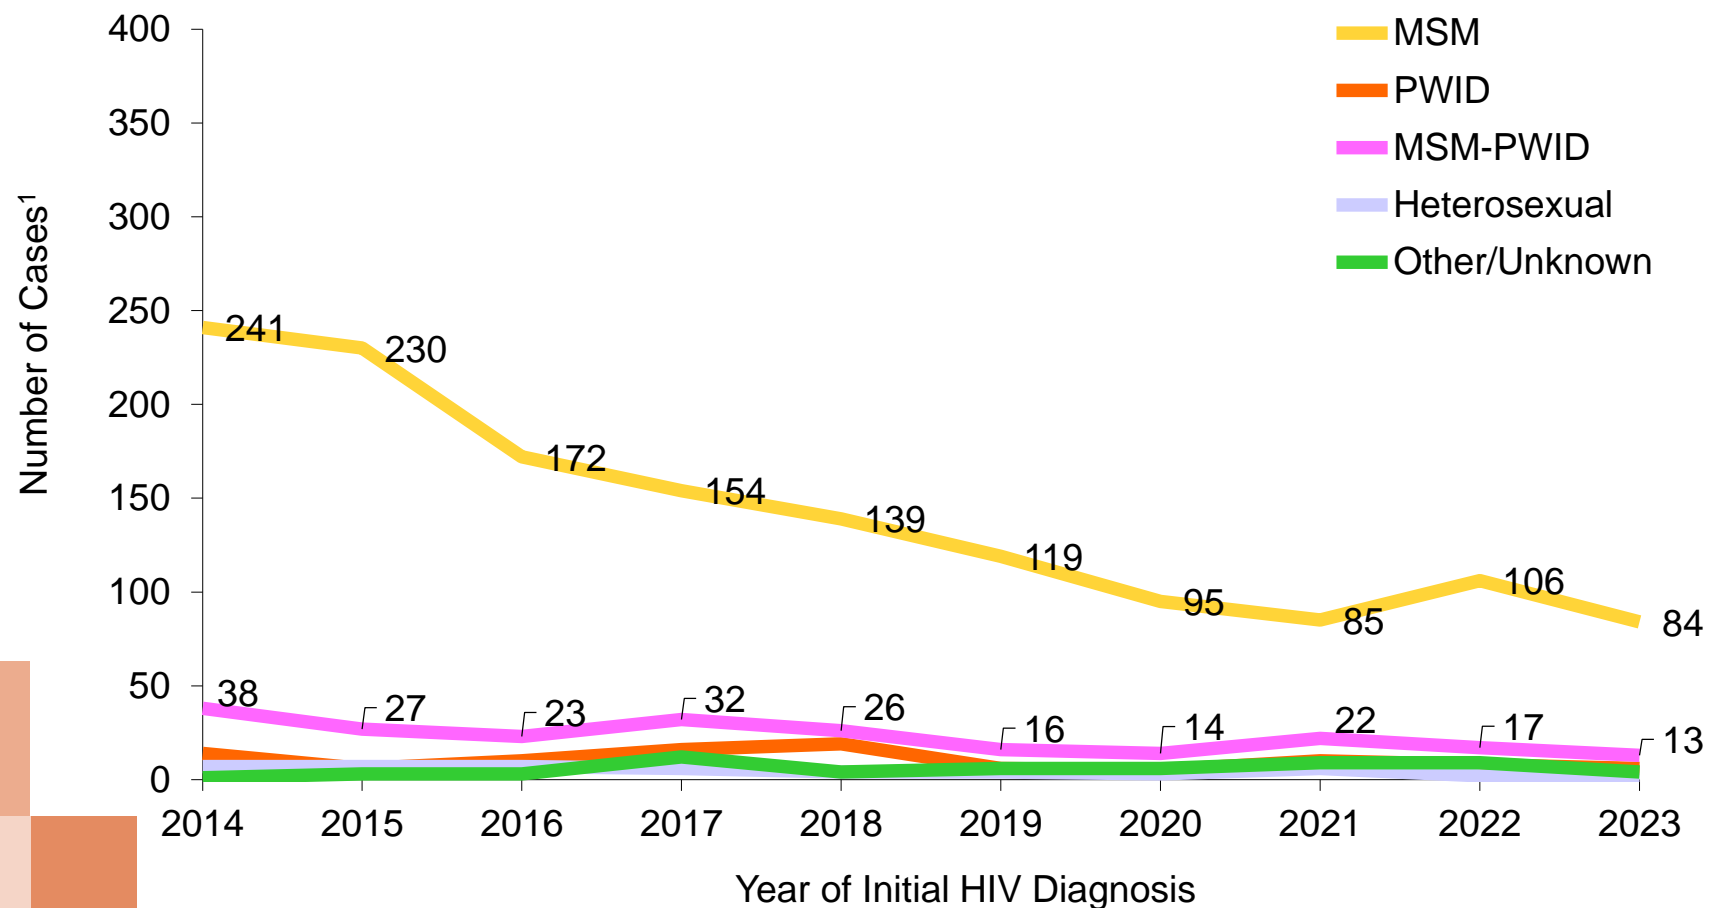

- PLWH 50 years and older: 74%
- 60 years and older: 45%
- 11,392 PLWH received care in SF in 2023
- 79% living in SF
- 21% living outside SF

1 Death data for 2023 not complete and not displayed.

Source: San Francisco HIV case surveillance registry, cases diagnosed as of 12/31/2023, reported as of 3/18/2024.

Diagnosis Trends by Race/ethnicity ⁷

(%): Percent of 2023 diagnoses

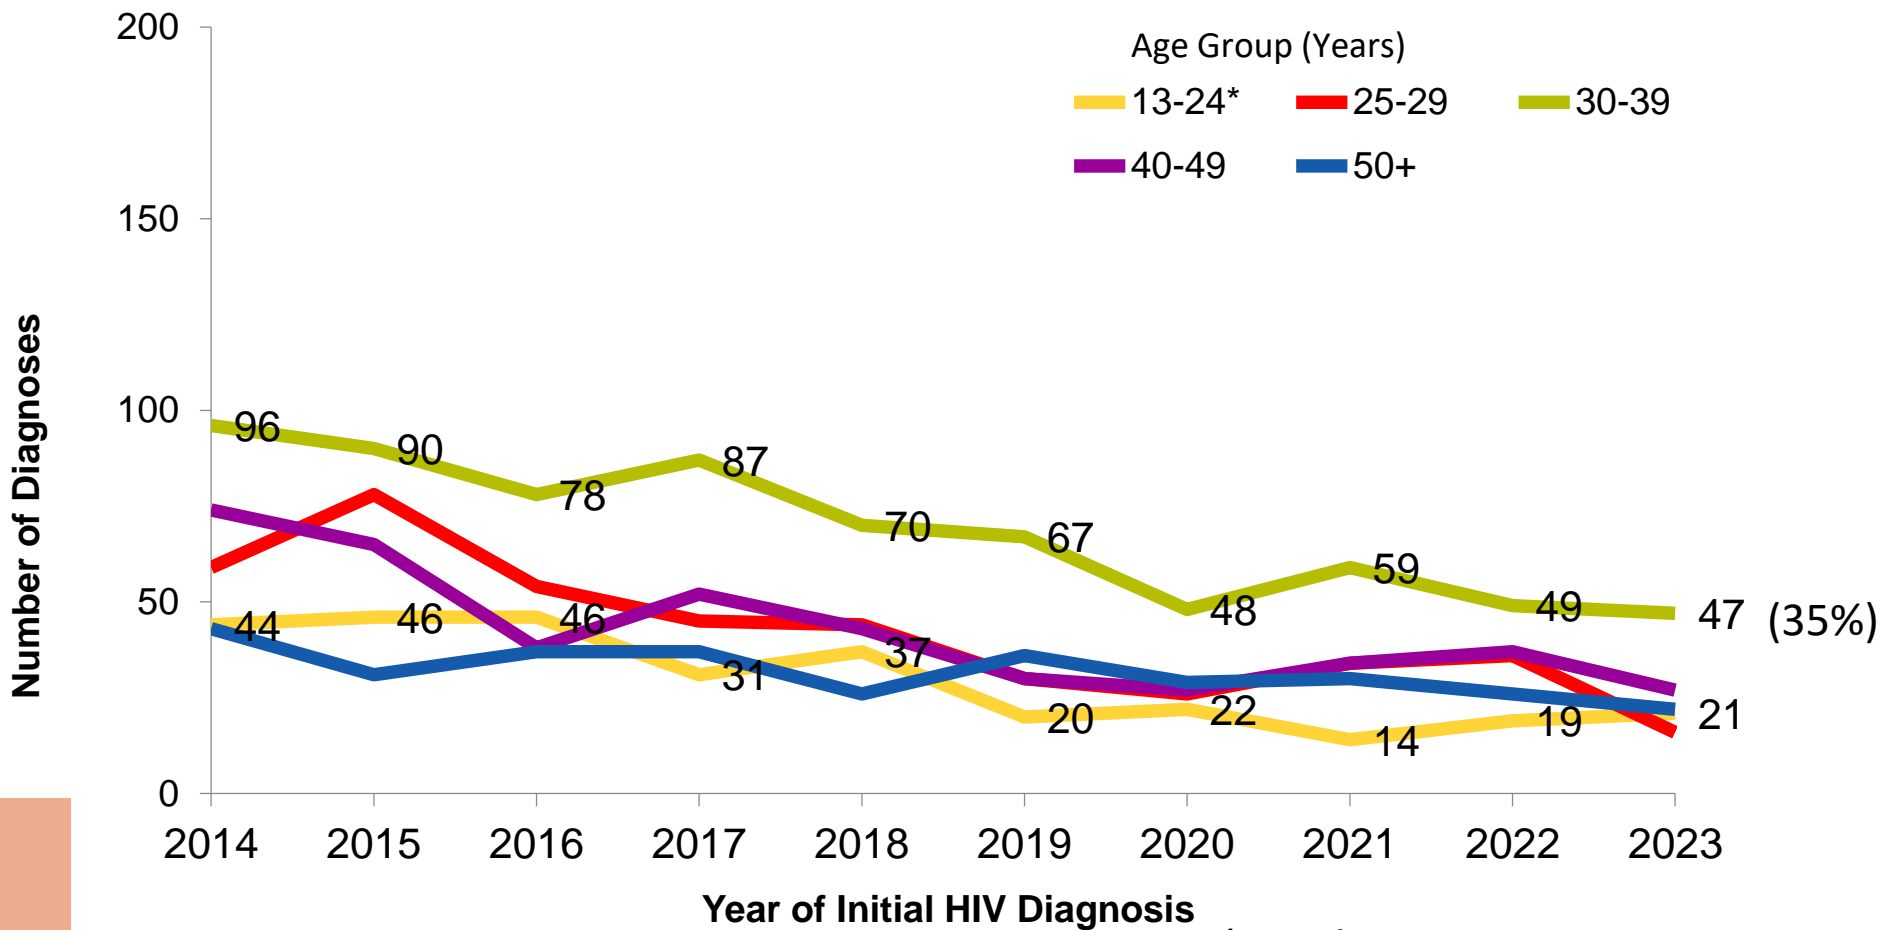

POPULATION HEALTH DIVISION
SAN FRANCISCO DEPARTMENT OF PUBLIC HEALTH

1 HIV diagnoses in the “Other/Unknown” racial/ethnic category include 20% Native Americans, 79% multi-race, and 1% unknown.

2 See Technical Notes “Date of Initial HIV Diagnosis.”

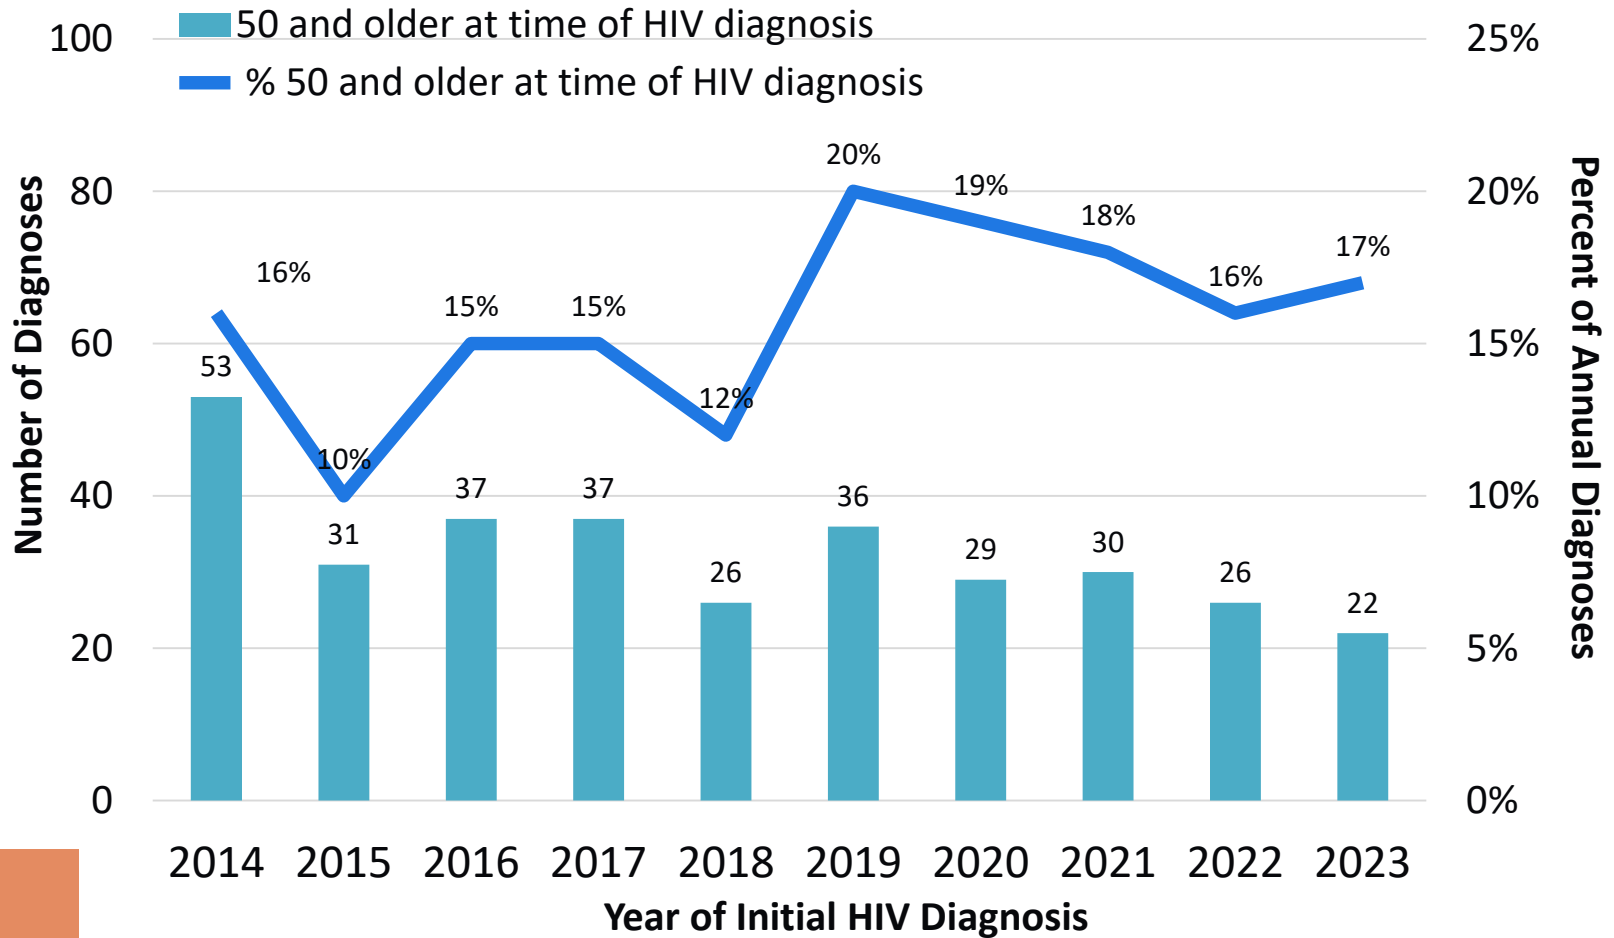

Diagnosis Trends by Age

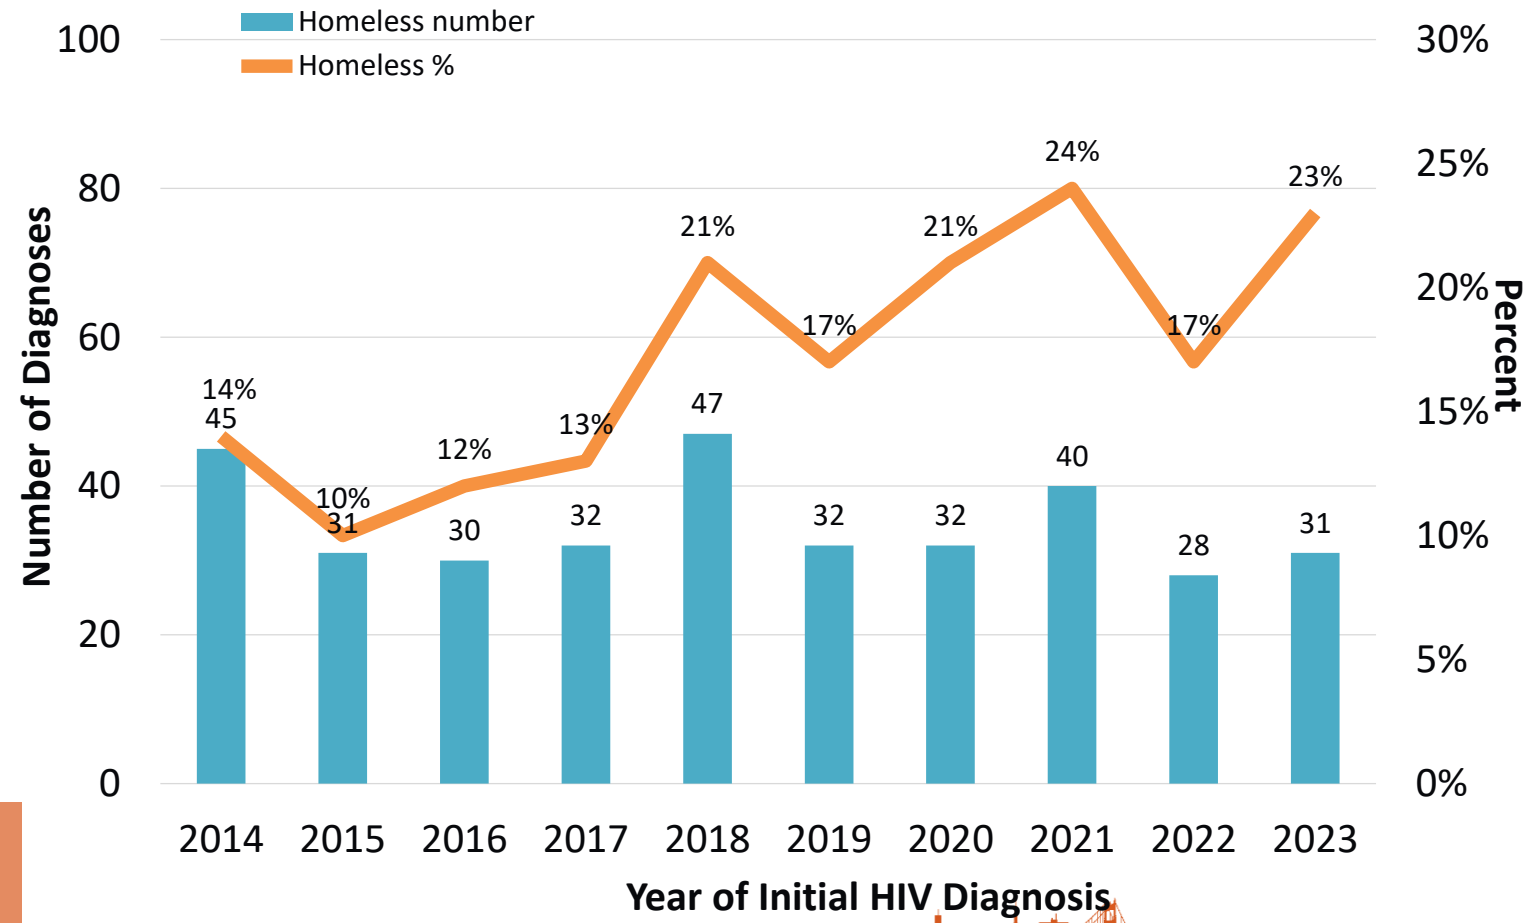

*No diagnoses in 13-17 y.o. from 2019-2023

Persons newly diagnosed age 50 years and older, 2014-2023

Number and percent of people experiencing homelessness (PEH) diagnosed 2014-2023, San Francisco

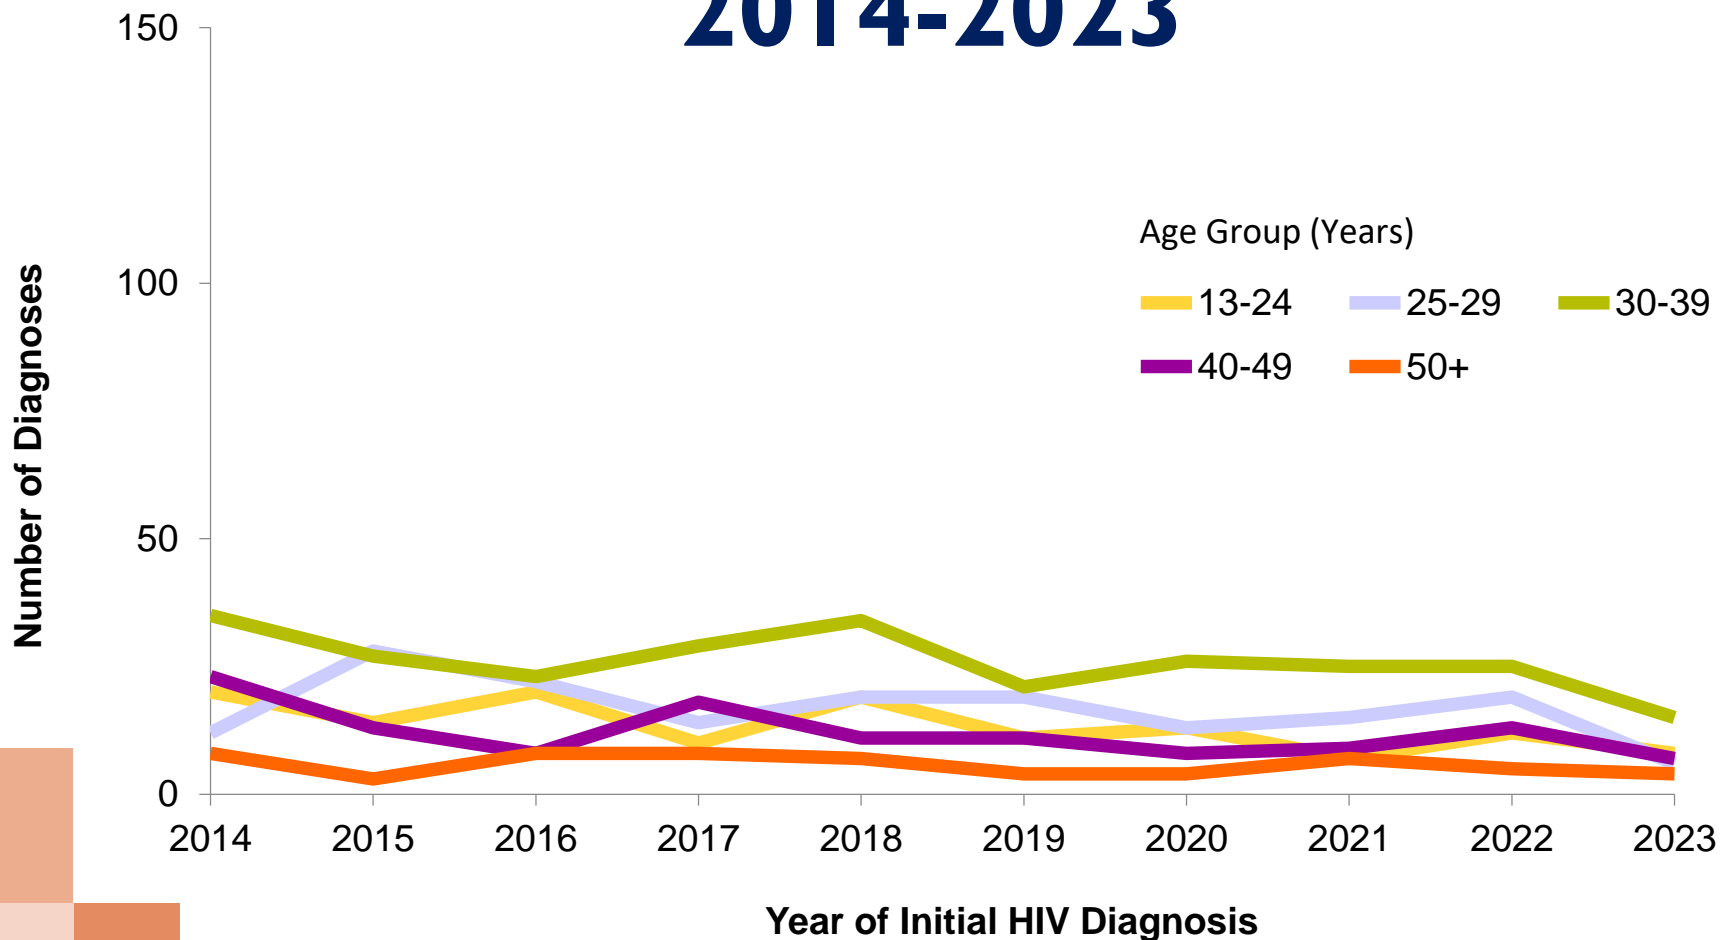

Persons Experiencing Homelessness Compared to Non-Homeless Diagnosed with HIV, 2014-2023

		New HIV Diagnoses, 2014-2023	
		Homeless	Non-Homeless
		Number (%)	
		348	1,819
Gender ¹	Cis Men	268 (77)	1,588 (87)
	Cis Women	55 (16)	138 (8)
	Trans Women	25 (7)	84 (5)
Race/Ethnicity	White	122 (35)	616 (34)
	Black/African American	74 (21)	250 (14)
	Latinx	117 (34)	623 (34)
	Asian/Pacific Islander	14 (4)	260 (14)
	Other/Unknown	21 (6)	70 (4)
Transmission Category	MSM	124 (36)	1,301 (72)
	TWSM	15 (4)	64 (4)
	PWID	85 (24)	94 (5)
	MSM-PWID	70 (20)	158 (9)
	TWSM-PWID	9 (3)	20 (1)
	Heterosexual	33 (9)	131 (7)
	Other/Unidentified	12 (3)	51 (3)
Age at Diagnosis (Years)	13 - 24	40 (11)	260 (14)
	25 - 29	63 (18)	360 (20)
	30 - 39	120 (34)	570 (31)
	40 - 49	74 (21)	353 (19)
	50+	51 (15)	276 (15)

Latina/o/x Diagnoses by Age, 2014-2023

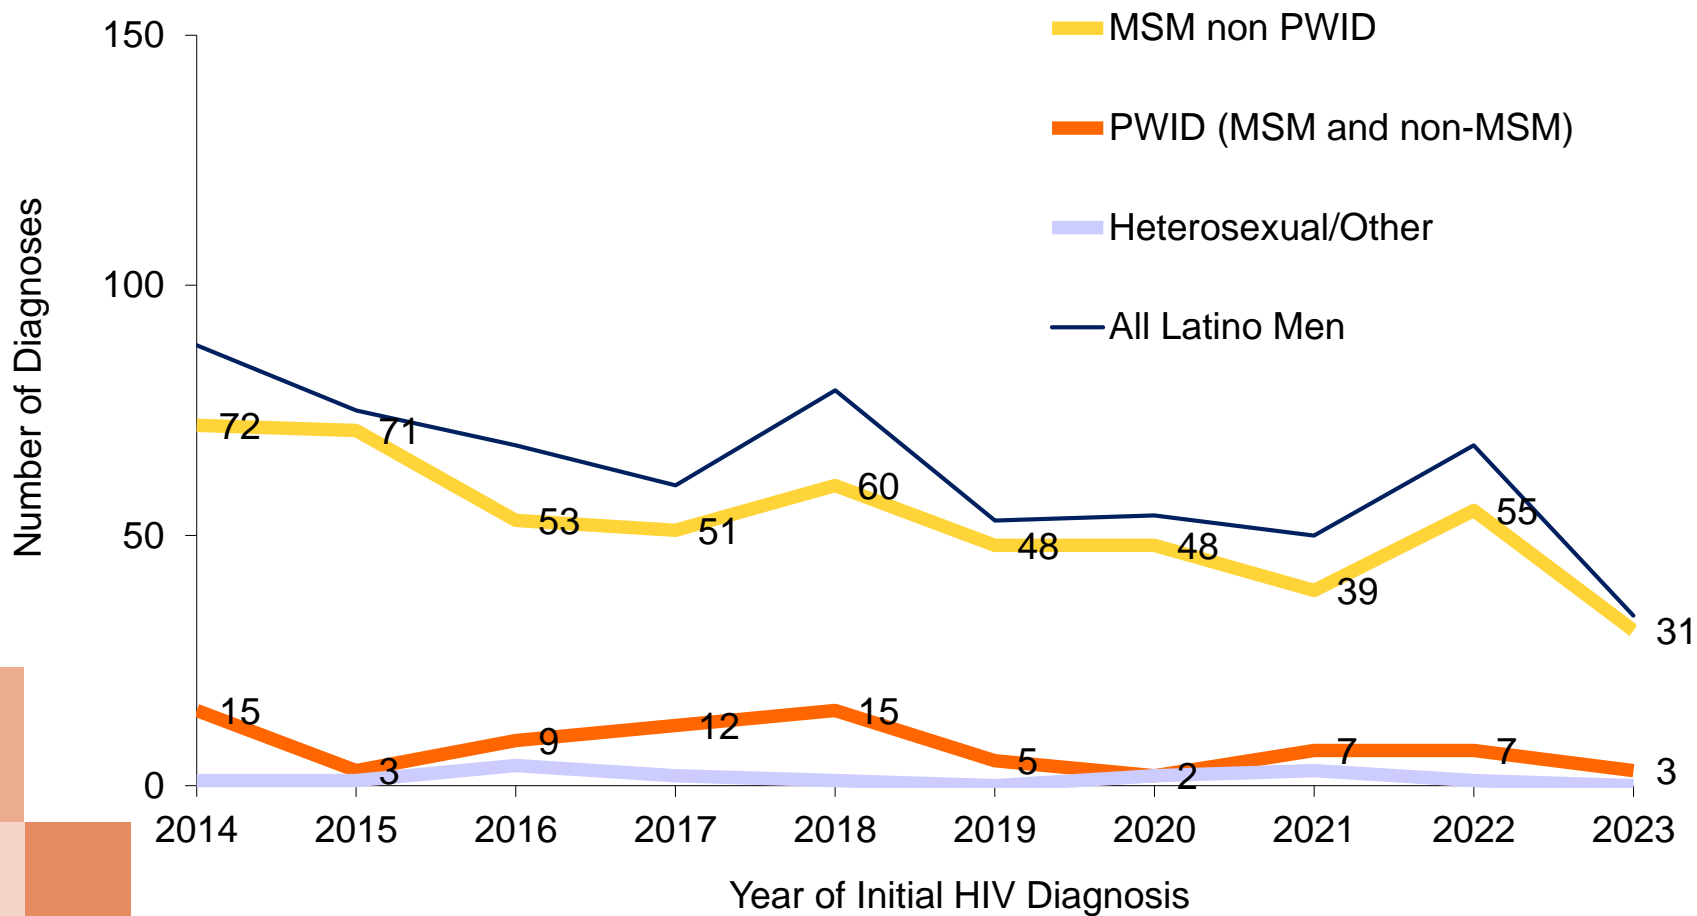

Gender distribution Latina/o/x Diagnoses, 2014-2023, San Francisco

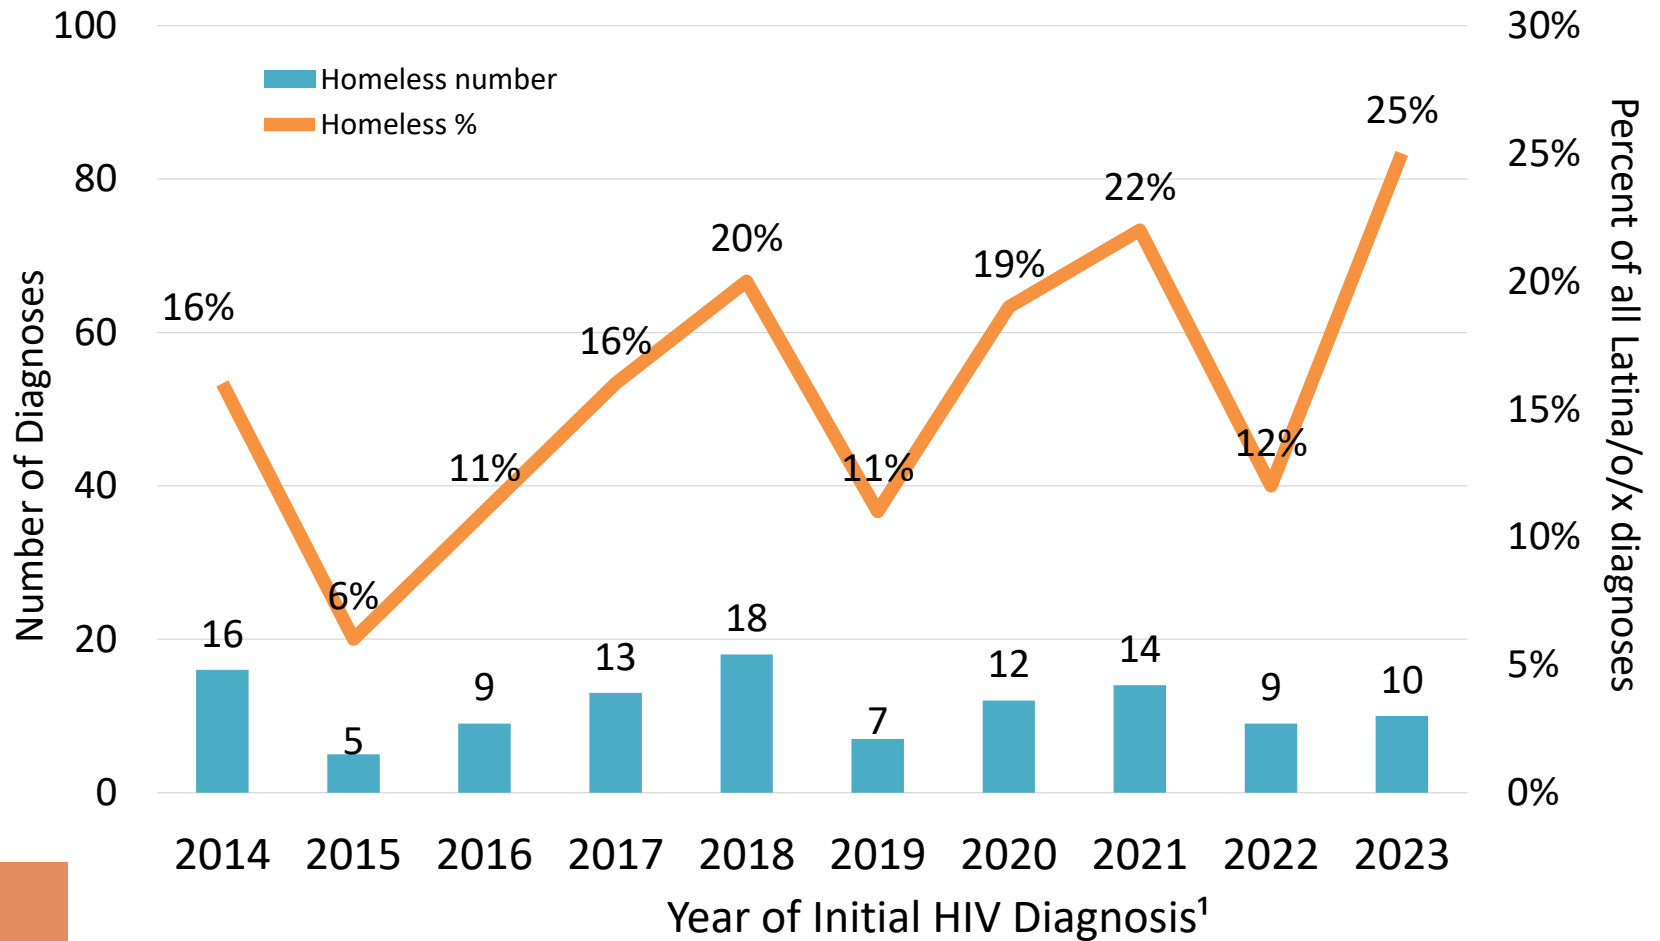

■ Cis Men
 ■ Cis Women
 ■ Transgender

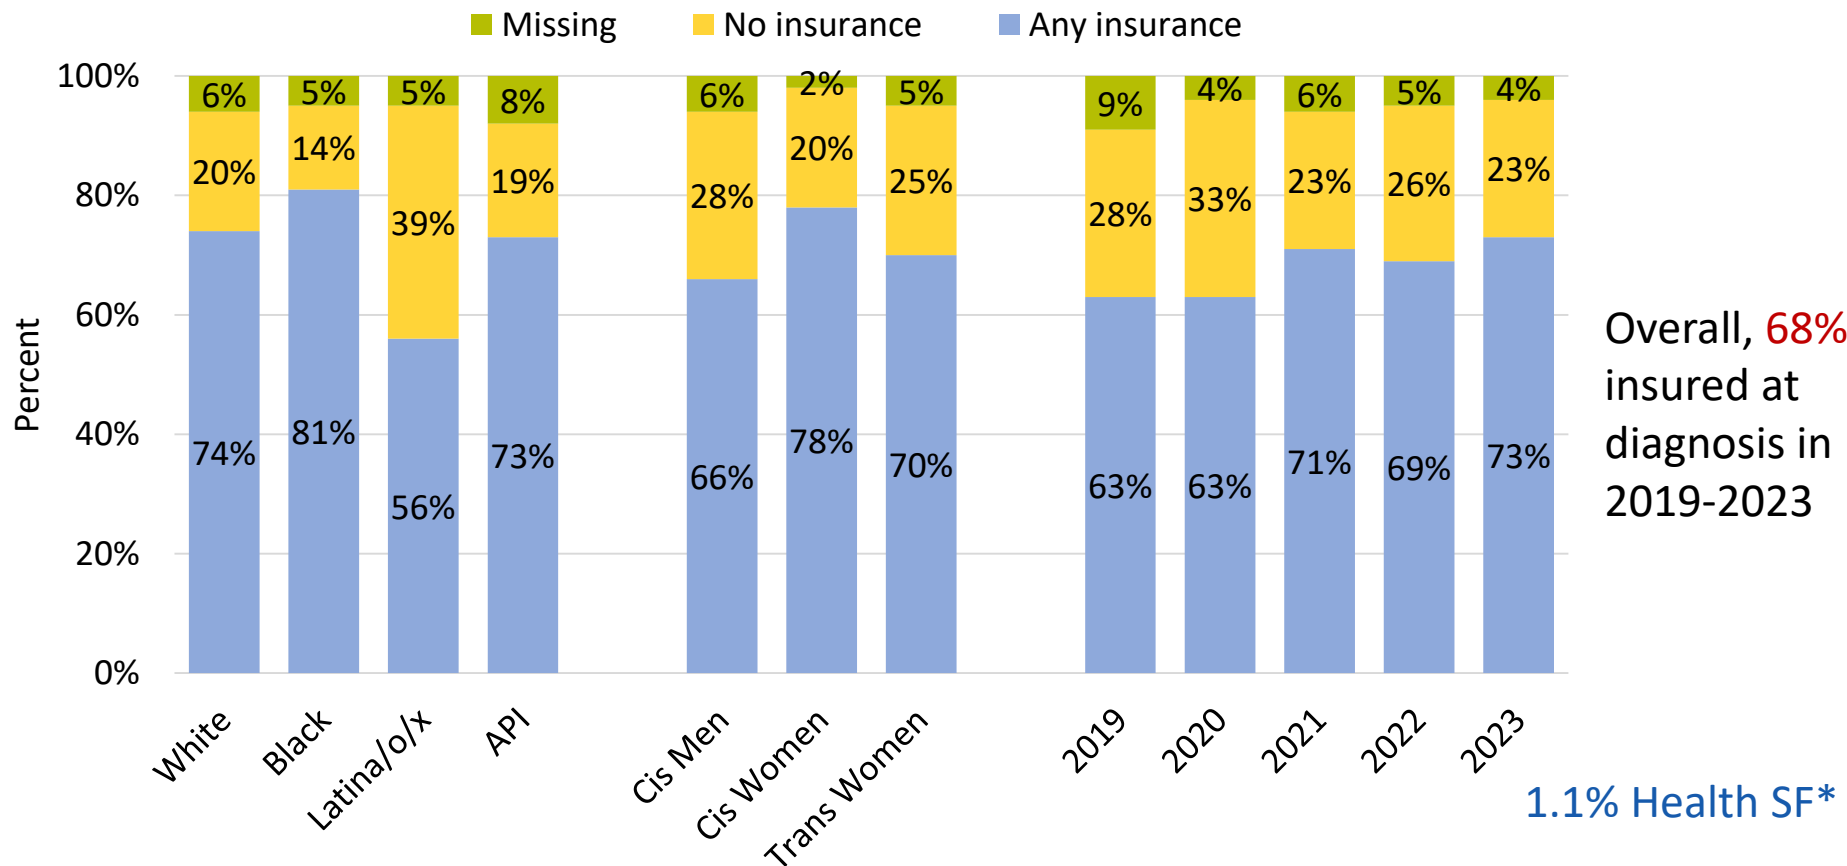

Diagnosis Trends among Latino Cis Men by Transmission Category

Number and percent of Latina/o/x PEH diagnosed 2014-2023, San Francisco

Health Insurance/Access Program at Diagnosis, 2019-2023

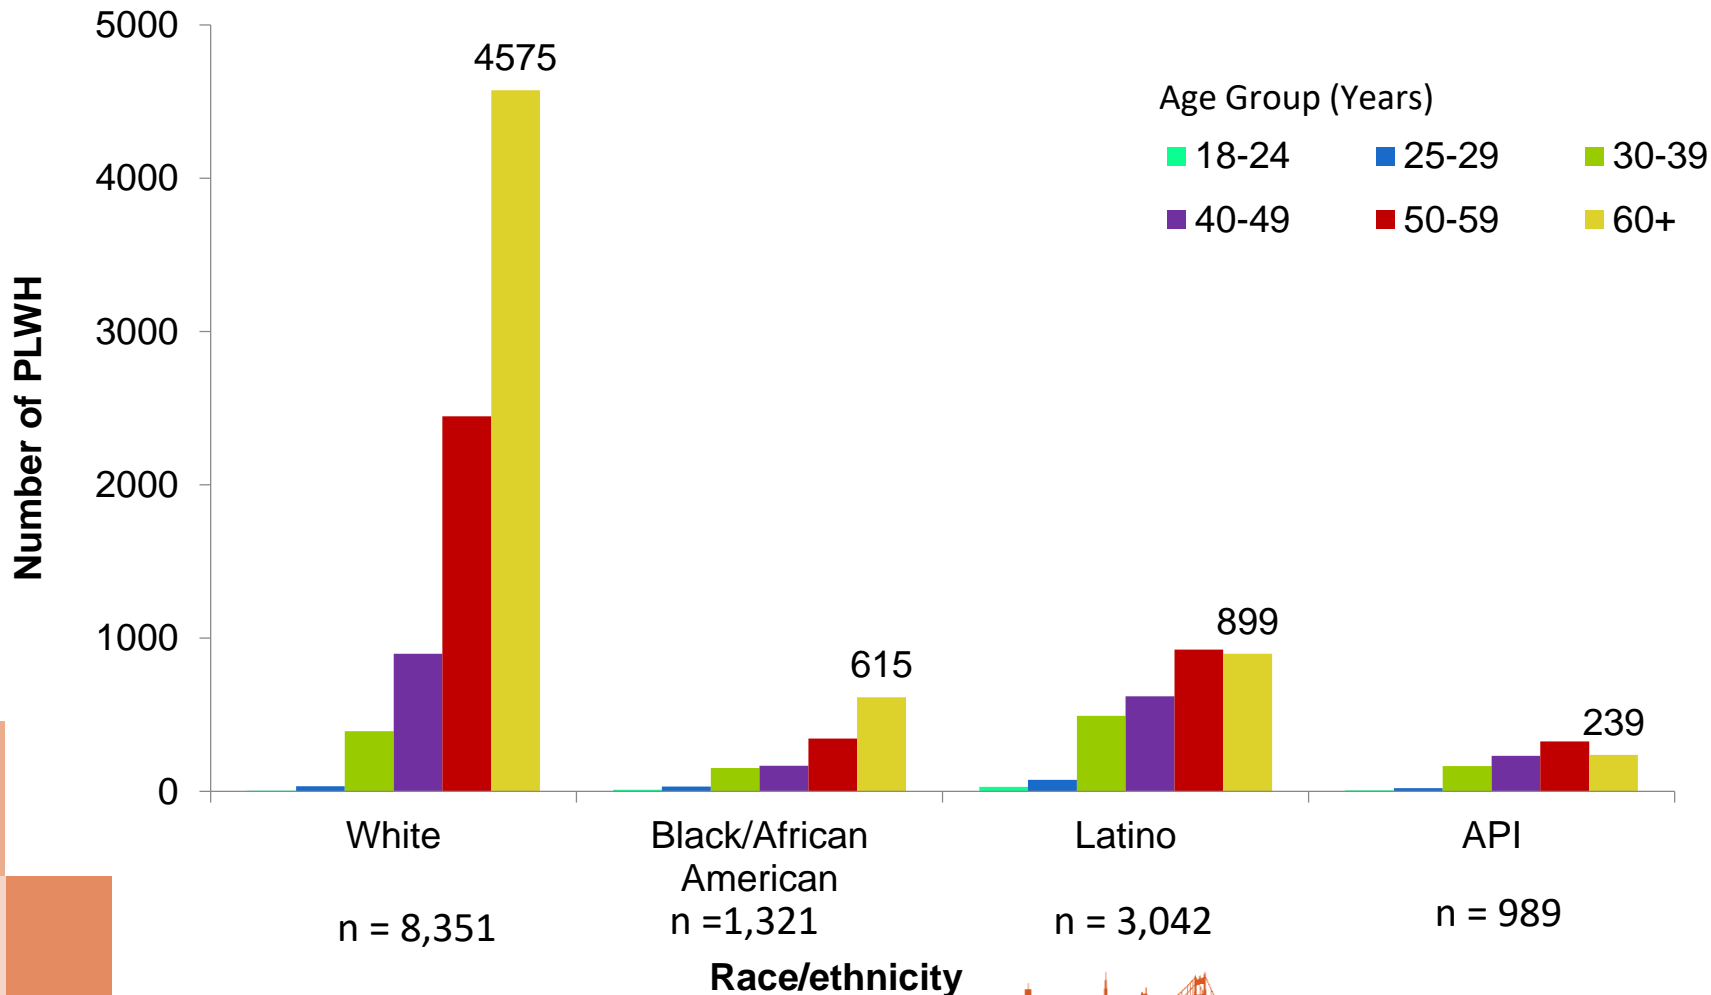

*Health SF: Health access program designed to make health care services available and affordable to uninsured San Francisco residents, operated by the San Francisco Department of Public Health (DPH).

Summary of New Diagnoses

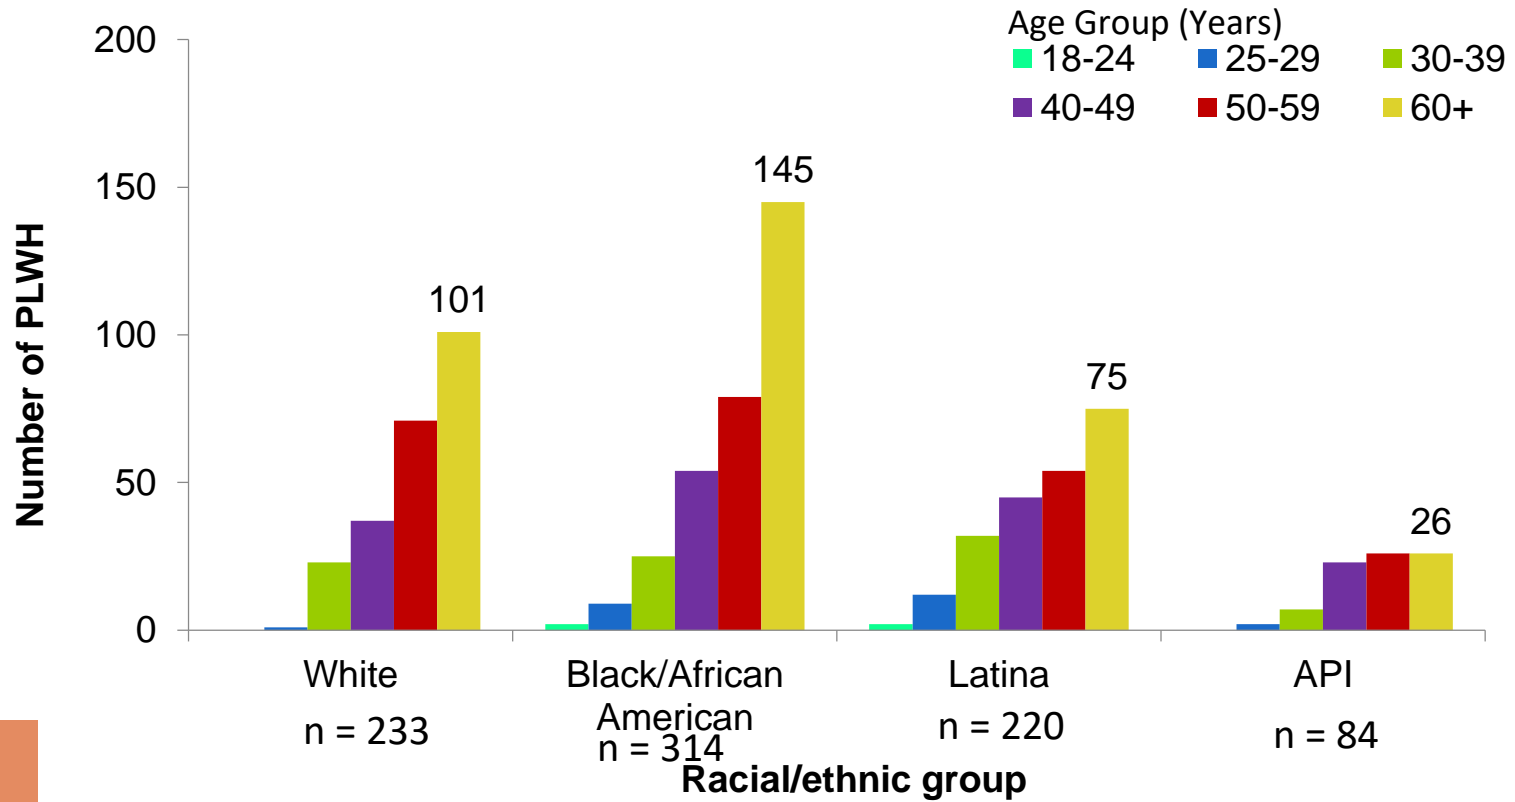

- Annual diagnoses decreased in 2023 by 20% compared to 2022
- By racial/ethnic group, Latina/o/x diagnoses had the largest decline in 2023
 - Decline mostly among Latino cis men
- People aged 30-39 y.o. most frequent among new diagnoses (more than one-third of 2023 diagnoses)
- Proportion of diagnoses 50+ years declined starting 2020
- People who experienced homelessness (PEH) accounted for 23% of 2023 diagnoses
- 68% of people diagnosed in last 5 years had health insurance at diagnosis
 - 73% of 2023 diagnoses

Cis-Men PLWH by Race/ethnicity and Age, December 2023

Cis Women PLWH by Race/ethnicity and Age, December 2023

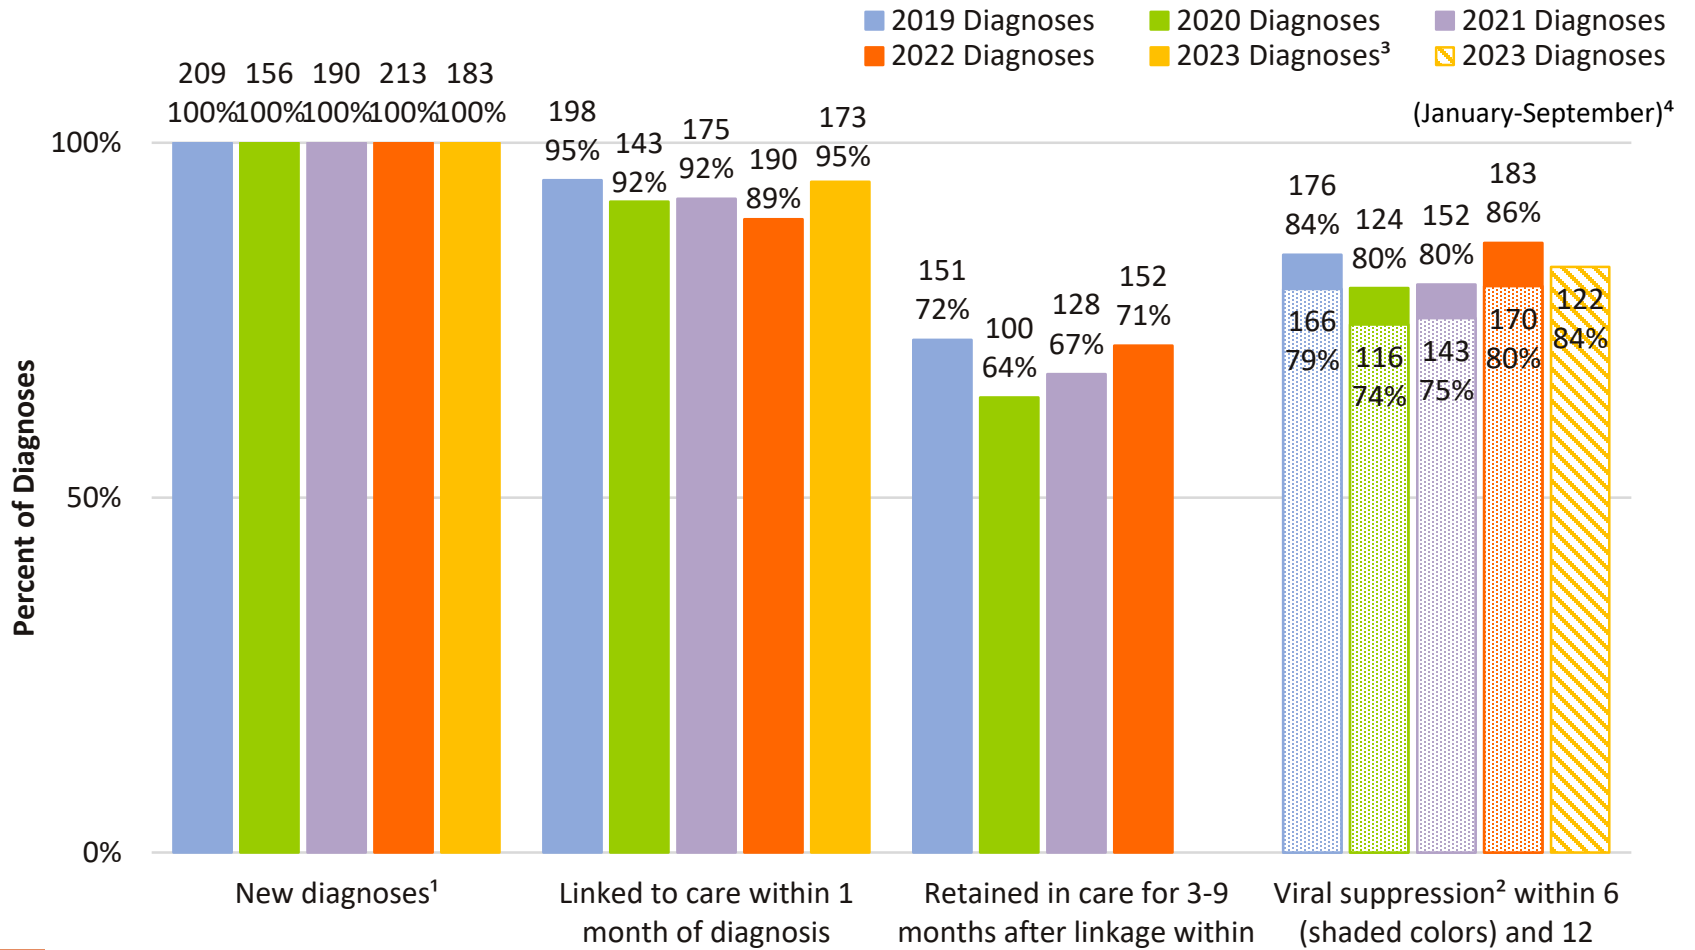

Trans Women PLWH by Race/ethnicity, December 2023

N = 438

HIV Care Continuum, New Diagnoses¹, 2019-2023

¹ Laboratory or physician confirmed in diagnosis year. Does not include person's self-report date of HIV infection.

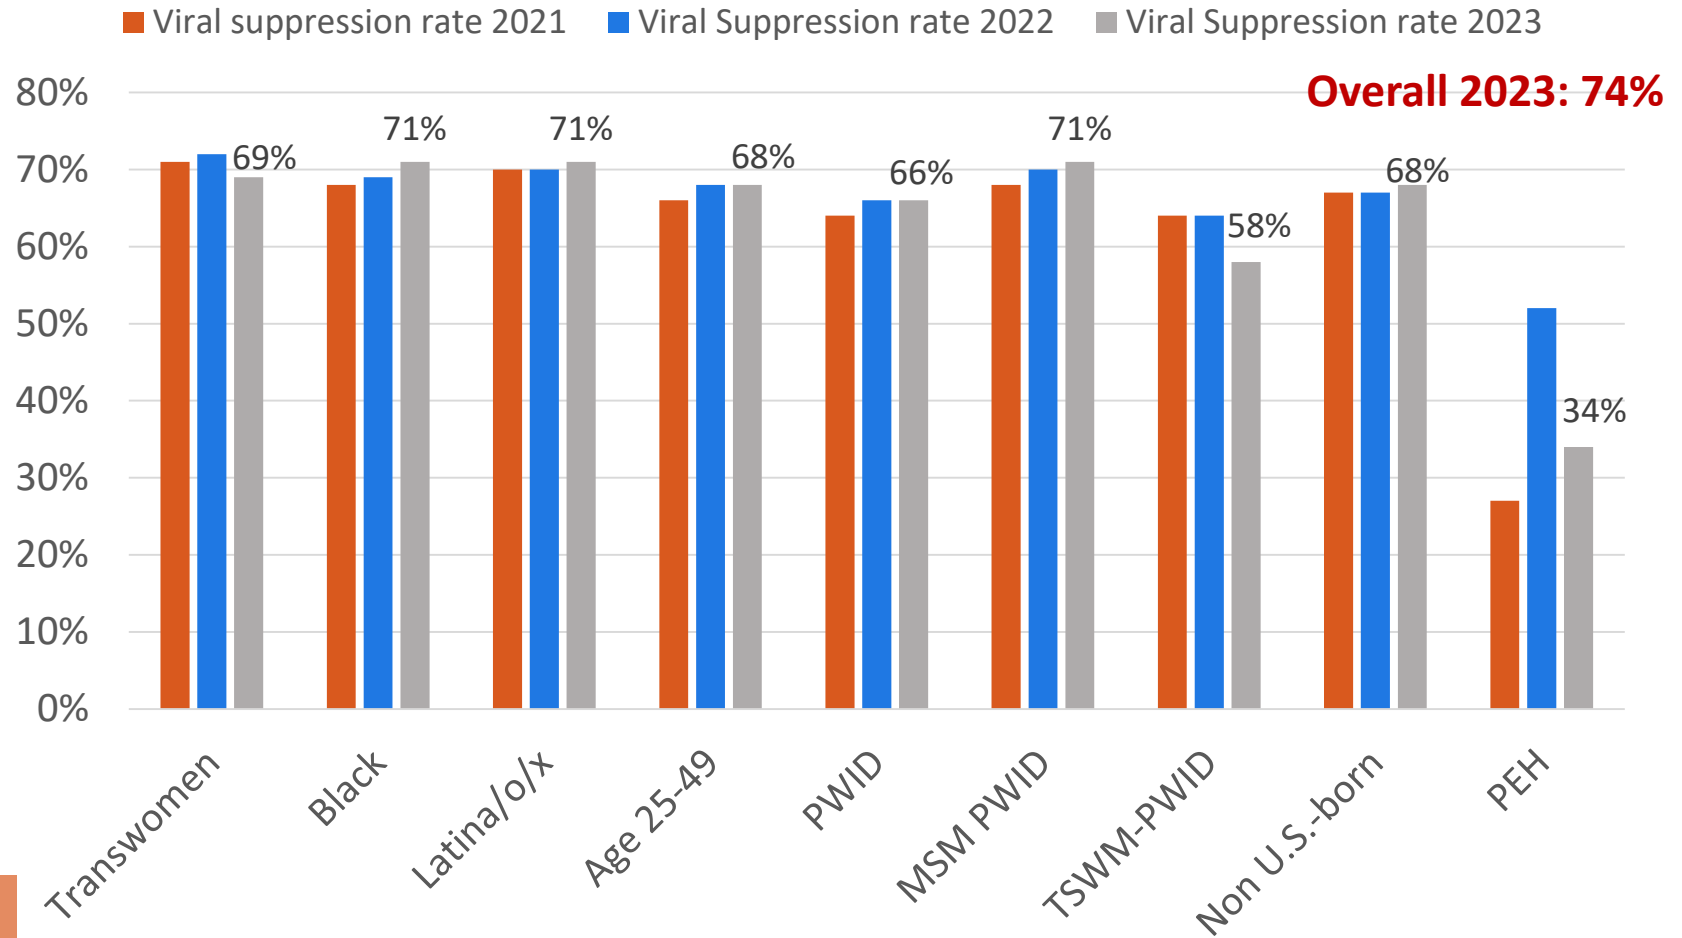

Proportion virally suppressed* among PLWH, 2018-2023, San Francisco

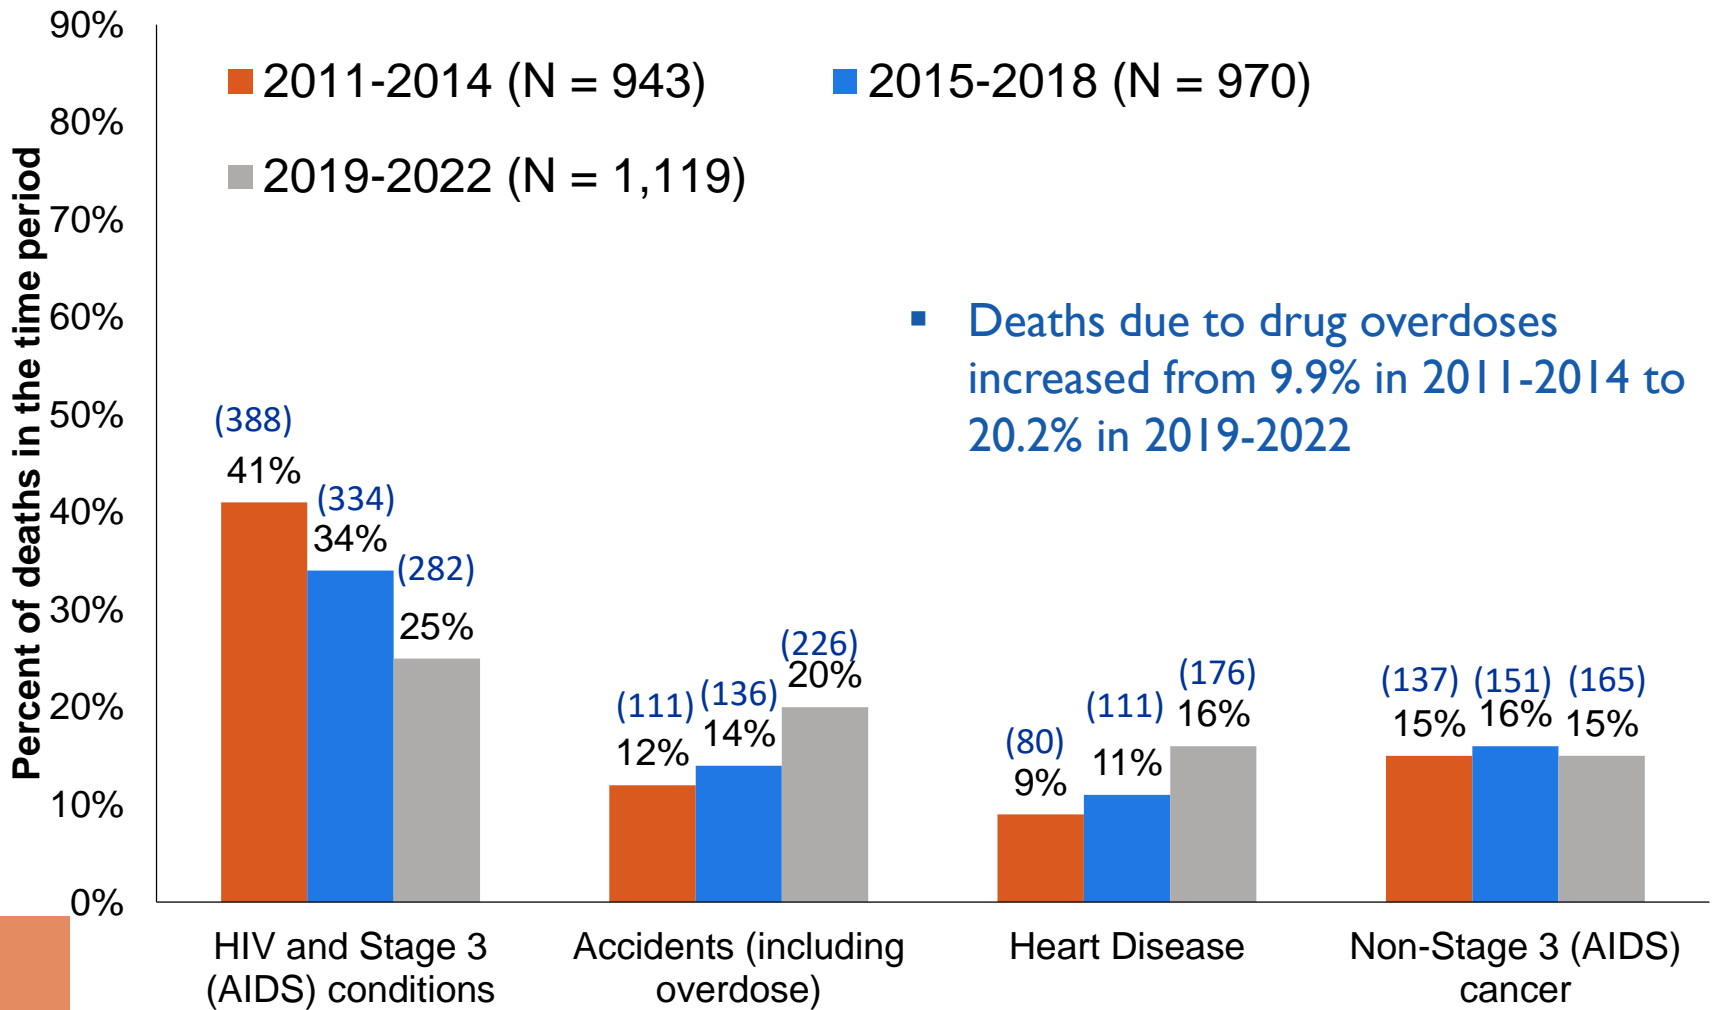

*Using the latest test in the year

Disparities in Viral Suppression among PLWH

Trends in Underlying Causes of Death among Persons with HIV

(No.): Number of deaths in the time period.

Medical Monitoring Project PLWH in Medical Care 2015-2022: Viral Suppression in prior 12 months*

	Number of Participants	Percent** of Participants
Total		
Most recent viral load suppressed	1,118	80%
All viral load measurements documented suppressed	1,048	75%

*during 12 months before interview

**weighted percentage

Unstable housing, unemployment, hunger/food insecurity during the 12 months before interview among persons with diagnosed HIV, by cycle year—Medical Monitoring Project, San Francisco, CA, 2015-2022

	Unstable housing or homelessness ^a	Unemployment ^b	Hunger/Food insecurity ^c
	Row % ^e	Row % ^e	Row % ^e
Cycle year			
2015		19.0	18.5
2016		9.8	19.9
2017		12.8	17.0
2018	19.1	10.9	21.7
2019	24.6	15.1	16.6
2020	24.2	14.6	18.1
2021	22.2	12.8	14.5
2022	21.5	15.1	13.9

Unmet needs for mental health services during the 12 months before interview among persons with diagnosed HIV, by cycle year—Medical Monitoring Project, San Francisco, CA, 2015-2022

Proportion of MSM currently on PrEP by race/ethnicity, San Francisco City Clinic patients, 2015-2023

1 On PrEP at visit: (1) Answer 'yes' to are you currently on PrEP or (2) Enrolled in PrEP as of visit. Due to continuous quality improvement of data cleaning and management processes, data are subject to change and might be different in previous reports.

2 Includes San Francisco residents only.

Proportion of MSM currently on PrEP¹ by age, San Francisco City Clinic patients², 2015-2023

1 On PrEP at visit: (1) Answer 'yes' to are you currently on PrEP or (2) Enrolled in PrEP as of visit. Due to continuous quality improvement of data cleaning and management processes, data are subject to change and might be different in previous reports.

2 Includes San Francisco residents only.

PrEP Program enrollment¹ and ongoing participation by PrEP regimen, San Francisco City Clinic PrEP Program participants, 2021-2023²

PrEP Regimen	Year					
	2021		2022		2023	
	N	%	N	%	N	%
Total enrolled	911	100.0	960	100.0	1,118	100.0
Daily PrEP	810	88.9%	793	82.6%	843	75.4%
PrEP 2-1-1	89	9.8%	150	15.6%	213	19.1%
LA-CAB	N/A		2	0.2%	50	4.5%

¹ Enrolled in the SFCC PrEP Program was defined as attending a PrEP enrollment visit and prescribed PrEP

² Each SFCC PrEP Program participant is represented in each year that they are reenrolled and continued to receive PrEP through SFCC. Because participants can change which regimen they want to use, if a participant used more than one regimen in the year, their regimen is identified according to the following hierarchy: LA-CAB, 2-1-1, Daily.
