Ending the Epidemics Preve ntion and Surveillance Overview

THE MASONIC TEMPLE

LUM

#### Federal Ending The HIV (HCV/STI) Epidemic(s) 2020

**Diagnose** all people with HIV as early as possible.

**Treat** people with HIV rapidly and effectively to reach sustained viral suppression.

**Prevent** new HIV transmissions by using proven interventions, including pre-exposure prophylaxis (PrEP) and syringe services programs (SSPs).

**Respond** quickly to potential HIV outbreaks to get needed prevention and treatment services to people who need them.

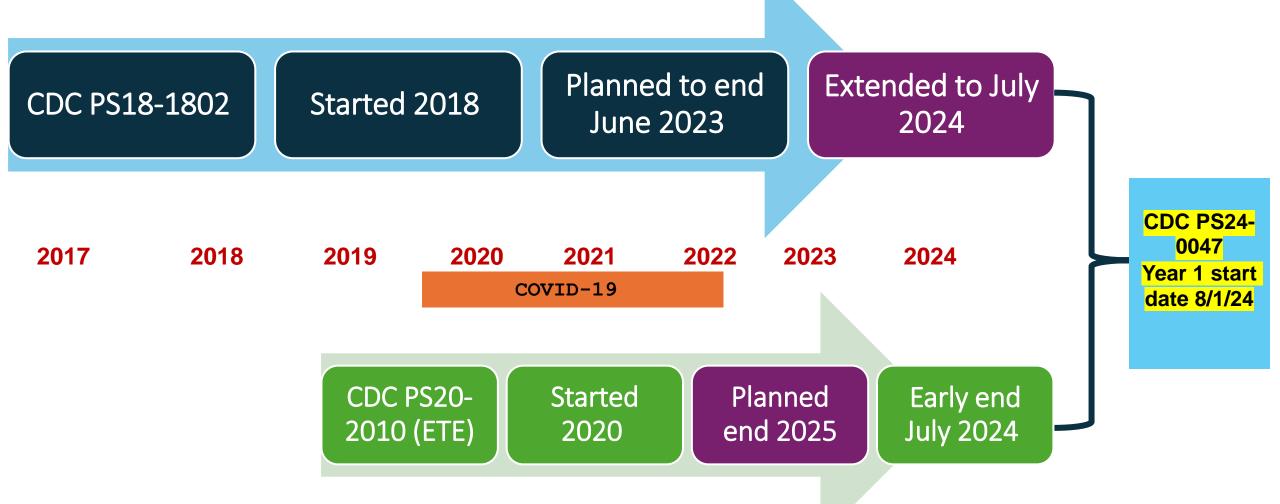

This 10-year initiative beginning FY 2020 seeks to achieve the important goal of reducing new HIV infections in the United States to less than 3,000 **GOAL:** 

**75%** reduction in new HIV infections in 5 years and at least

**90%** reduction in 10 years.

#### Background: CDC Funding 18-1802 and 20-2010 (ETE) Merge Plan

•Reducing new HIV infections in the United States by 75% by 2025 and by 90% by 2030

#### Diagnose all people with HIV as early as possible.

 ${\bf Treat}\ {\rm people}\ {\rm with}\ {\rm HIV}\ {\rm rapidly}\ {\rm and}\ {\rm effectively}\ {\rm to}\ {\rm reach}\ {\rm sustained}\ {\rm viral}\ {\rm suppression}.$ 

**Prevent** new HIV transmissions by using proven interventions, including pre-exposure prophylaxis (PrEP) and syringe services programs (SSPs).

**Respond** quickly to potential HIV outbreaks to get needed prevention and treatment services to people who need them.

↓ Core HIV Surveillance & Community Engagement strategies support successful implementation of activities, leading to

### CDC PS24-0047 Overview Category / Pillars

- 2024 (5 years cycle)
- A merge of 18-1802 and 20-2010
- National syndemic, HIV, STI, Hep-C

5.Core HIV surveillance

6. Community engagement

### San Francisco ETE Implementation

### San Francisc DPH 24-0047 Application Overview

St	ra	tegies and Activities	ST Outcomes	IT Outcomes	Goals
		<ul> <li>Increase integrated HIV/HCV/STI screening &amp; TB &amp; mpox testing</li> <li>EHE: Partner with housing providers</li> </ul>	ST1.1 Increased HIV ROOT ST1.2 Increased HIV testing accessibility ST1.3 Increased identification of new HIV diagnoses and PWH not in care ST1.4 Increased integrated screening	IT1.1 Increased knowledge of HIV status IT1.2 Reduced late diagnoses	
Core niv Survenia, to Community Engagement**	спвавеннени	diagnosed •HIV care retention addressing disparities •Integrate HCV LTC •EHE: Scale up LAI ART •EHE: Navigation in jails/Gender	<ul> <li>ST2.1 Increased rapid LTC</li> <li>ST2.2 Increased receipt of HIV partner services</li> <li>ST2.3 Increased care engagement for PWH</li> <li>ST2.4 Increased early ART initiation</li> <li>ST2.5 Increased receipt of support services</li> </ul>	IT2.1 Increased receipt of HIV medical care IT2.2 Increased HIV viral suppression	<ul> <li>Reduced new HIV infections</li> <li>Improved health</li> </ul>
Community		Points • Focus on Latine MSM, PEH, and PWU/ID • PrEP scale-up • Integrated HIV/HCV/STI messaging & services	<ul> <li>ST3.1 Increased linkage to PrEP/PEP</li> <li>ST3.2 Increased availability of condoms</li> <li>ST3.3 Increased availability of harm reduction services/SSPs</li> <li>ST3.4 Increased awareness of PrEP/PEP</li> <li>ST3.5 Improved perinatal HIV surveillance data</li> <li>ST3.6 Improved perinatal HIV services</li> </ul>	IT3.1 Increased PrEP/PEP prescriptions and use IT3.2 Increased SSP use IT3.3 Reduced perinatal HIV	outcomes for PWH • Reduced disparities
		<ul> <li>Monitor for, detect, and respond to clusters</li> <li>EHE: CDR dashboard</li> <li>EHE: CDR outbreak</li> </ul>	<b>ST4.1</b> Improved early identification and investigation of HIV clusters <b>ST4.2</b> Improved data about clusters and response	IT4.1 Improved response to HIV clusters	

Core HIV Surveillance & Community Engagement strategies support successful activity implementation, leading to

\*ST5.1 Improved HIV surveillance data for public health action; ST5.2 Improved monitoring of HIV trends; ST5.3 Improved data security, confidentiality, and protections; IT5.1 Improved use of HIV surveillance data to identify syndemics; IT5.2 Improved electronic data exchange capacity; IT5.3 Improved visualization of HIV surveillance data for public health action

**\*\*ST6.1** Increased collaborations and engagement with communities; ST6.2 Increased coordination and access to comprehensive HIV services; IT6.1 Sustained community partnerships

### Test

Strategies and Activities		gies and Activities	ST Outcomes	IT Outcomes
	TEST	<ul> <li>Keep what is working</li> <li>Increase integrated HIV/HCV/STI screening &amp; TB &amp; mpox testing</li> <li>EHE: Partner with housing providers</li> <li>EHE: Mobile Health Access Point</li> </ul>	<ul> <li>ST1.1 Increased HIV ROOT</li> <li>ST1.2 Increased HIV testing accessibility</li> <li>ST1.3 Increased identification of new HIV diagnoses and PWH not in care</li> <li>ST1.4 Increased integrated screening</li> </ul>	IT1.1 Increased knowledge of HIV status IT1.2 Reduced late diagnoses

# Test

- Continue routine opt-out testing, SF network
- Continue routine perinatal HIV testing, (no children age <13 since 2005)
- Integrate HIV, STI and HCV testing into HAPs
- TakeMeHome
- Expand HCV and STI in SF Testing Network
- Work with HSH to improve HIV/STI/HCV testing, sexual health services and overdose prevention for people experience homelessness
- Expand mobile testing and other prevention services

### Treat

TREAT

Strategies and Activities	ST Outcomes	IT Outcomes
<ul> <li>Linkage to care (LTC) for all newly diagnosed</li> <li>HIV care retention addressing disparities</li> <li>Integrate HCV LTC</li> <li>EHE: Scale up LAI ART</li> <li>EHE: Navigation in jails/Gender Health</li> </ul>	<ul> <li>ST2.1 Increased rapid LTC</li> <li>ST2.2 Increased receipt of HIV partner services</li> <li>ST2.3 Increased care engagement for PWH</li> <li>ST2.4 Increased early ART initiation</li> <li>ST2.5 Increased receipt of support services</li> </ul>	IT2.1 Increased receipt of HIV medical care IT2.2 Increased HIV viral suppression

# Treat

- Offer RAPID ART via LINCS
- Continue Data to Care efforts, ARCHES, LINCS and SFHN
- Expand LAI efforts with focus on Black, Latine, PEH and PWUDs
- Continue to support Jail h with navigation

#### Prevent

PREVENT

<ul> <li>New integrated Health Access Points</li> <li>Focus on Latine MSM, PEH, and PWU/ID</li> <li>PrEP scale-up</li> <li>ST3.1 Increased linkage to PrEP/PEP</li> <li>ST3.2 Increased availability of condoms ST3.3 Increased availability of harm reduction services/SSPs</li> <li>ST3.4 Increased awareness of PrEP/PEP</li> <li>IT3.1 Increased PrEP/PEP</li> <li>IT3.2 Increased and use</li> <li>IT3.2 Increased</li> </ul>	Strategies and Activities	ST Outcomes	IT Outcomes	
<ul> <li>Integrated HIV/HCV/STI messaging &amp; services</li> <li>EHE: Workforce capacity-building</li> <li>ST3.5 Improved perinatal HIV surveillance data</li> <li>SSP use</li> <li>SSP use</li> <li>SSP use</li> <li>ST3.6 Improved perinatal HIV services</li> </ul>	Points <ul> <li>Focus on Latine MSM, PEH, and PWU/ID</li> <li>PrEP scale-up</li> <li>Integrated HIV/HCV/STI messaging &amp; services</li> </ul>	<ul> <li>ST3.2 Increased availability of condoms</li> <li>ST3.3 Increased availability of harm reduction services/SSPs</li> <li>ST3.4 Increased awareness of PrEP/PEP</li> <li>ST3.5 Improved perinatal HIV surveillance data</li> </ul>	PrEP/PEP prescriptions and use IT3.2 Increased SSP use IT3.3 Reduced	

### Prevent

- Provide training and technical assistance to support the HAPs to provide fully integrated whole-person services to priority populations
- Expand access to PrEP and PEH and PWU/IDs
- Continue to make free condoms and safer sex widely available
- $\bullet$  Support harm reduction services for PEH and PWU/ID
- Prevention Social Market Campaign for Latino/a/x/e
- HIV and Syphilis testing for people who become pregnant
- Annual Conference for frontline works

### Respond

	Strategies and Activities	ST Outcomes	IT Outcomes	
RESPOND	<ul> <li>Monitor for, detect, and respond to clusters</li> <li>EHE: CDR dashboard</li> <li>EHE: CDR outbreak simulation</li> </ul>	<b>ST4.1</b> Improved early identification and investigation of HIV clusters <b>ST4.2</b> Improved data about clusters and response	IT4.1 Improved response to HIV clusters	

# Respond

- Maintain cross-program Cluster Detection and Response Workgroup
- Partner and Community engagement Cluster Detection and Response
- Use HIV-TRACE for Cluster Detection and
- Respond to Clusters and Outbreaks and p
- Build a Cluster Detection and Response day
- Conduct a Cluster Detection and Respons simulations

# Surveillance Strateav 5

- Conduct HIV surveillance data collection and reporting
- HIV surveillance data to care
- Make HIV surveillance data analyses routinely available to SFDP and community partners

#### HIV Diagnoses, Deaths and Prevalence 2009–2019, San Francisco

## Community Engagement & Planning Strategy 6

- Mini Grants to engagements
- Develop Youth engagement strategy
- Continue to partner with HCPC
- Develop a streamlined syndemic and SDoH-focused integrated plan that meets the CDC and HRSA integrated plan requirements, aligns with California's Strategic Plan to End the Epidemics, and serves as SF's Ending the Epidemics Plan.
